INTRODUCTION

The TEMPUS Programme

TEMPUS forms part of the overall programme of Community aid for the economic restructuring of the countries of Central/Eastern Europe, known as PHARE, within which training is one of the priority areas for cooperation.

To implement this objective TEMPUS, the Trans-European Mobility Scheme of University Studies, was adopted by the Council of Ministers of the European Community on 7 May 1990, for an initial 'pilot phase' of three years beginning on 1 July 1990, within a perspective of five years.

Targeted to meet the specific needs of Central and Eastern Europe, the double objective of TEMPUS is to promote the quality and support the development of the higher education systems in the countries of Central/Eastern Europe designated as eligible for economic aid, by encouraging their growing interaction with partners in the European Community.

The main vehicle for ensuring this cooperation are Joint European Projects, which involve the participation of at least one university from an eligible country, and of partner organisations, of which one must be a university, in at least two EC Member States.

Grants could be awarded for cooperative education and training activities, such as student and staff mobility, retraining and updating, curriculum development and intensive programmes, structural development of higher education and sector specific actions.

In parallel with this project-based support (Action 1), individual mobility grants for staff (teaching assignments, practical placements, staff retraining and updating and visits) and for students (periods of study or practical placements) were also provided for (Action 2). Under the TEMPUS Programme, however, it is planned to give increasing preference to mobility taking place within Joint European Projects.

Thirdly, limited support was also available for the extension to the eligible countries of European associations in higher education, for publications and other information activities related to the TEMPUS Programme, and for surveys and studies intended to assist in its monitoring and evaluation. There was also provision for limited support for youth exchanges and related activities intended to catalyse the acquisition by young people of a better awareness of the European dimension.

The total budget available for 1990 amounted to 25 MECU. Following deduction of 7.3% or 1,824,580 ECU for technical assistance, this meant a total of 23,175,420 ECU for programme operations, broken down according to the countries eligible for support as follows :

* Poland:	12.357.134	ECU	(53,32%)
* Hungary:	6.183.202	ECU	(26,68%)
* Czechoslovakia:	3.708.067	ECU	(16,00%)
* former DDR:	927.014	ECU	(4,00%).

TEMPUS Activities in 19900

Joint European Projects (JEPs)

A total of 1338 proposals for Joint European Projects were received, requesting some 209 MECU. The final decision was taken to award a total of 16,510,000 ECU to 153 JEPs. This means an average of 107,908 ECU per project. The basis of the selection of these projects was the desire, within the budget available, to give sufficient support to the relatively small number of projects chosen (11,4% of the total number of applications received) to enable them to carry out their proposed activities. This was in line with the overall aim of the TEMPUS Programme, namely to support the development of the higher education systems in the eligible countries with due regard to the priorities for funding established by these countries.

Most of the 153 JEPs accepted for support were in the priority subjects specified by the eligible countries, in particular engineering and applied sciences (28,8%) and in business management (15%), while 20,4% of projects dealt with non-priority areas, nevertheless considered to be relevant (e.g. teacher training, law and medical sciences).

Poland participated in 55.6%, Hungary in 41.2%, Czechoslovakia in 25.5% and the former DDR in 7.8% of the Joint European Projects supported.

Individual Mobility

In addition to the mobility supported within JEPs, grants were awarded to considerable numbers of individual teachers and students, in particular from the eligible countries. More than 700 Polish, Hungarian and Czech students and 500 teachers are spending study/updating or teaching periods in EC Member States in 1990/91. The total funds required from the 1990/91 budget to finance the individual East/West mobility amounted to 5,223,812 ECU, of which 4,083,309 ECU was for students and 1,140,503 ECU for academic staff. Altogether 315 European Community staff members and 35 students also received grants to study or teach in the eligible countries during academic year 1990/91, 356,578 ECU being required for the staff members involved and 59,600 ECU for the students.

Complementary Measures

A total of 40 projects were selected for support under Action 3 of TEMPUS to enable the completion of a limited number of specific projects submitted by associations of universities, for publications and for studies and surveys which fulfil the aim of promoting the TEMPUS Programme.

Associational and information activities under Action 3 normally have a professional/sectoral basis rather than a geographical one (e.g. a transnational newsletter on engineering education rather than one on education opportunities in a wide range of subjects in a particular region of one Member State of the European Community), except in the case of activities specifically directed at providing information-training to multipliers in the eligible countries in the form of intensive seminars and other training activities specifically related to stimulating and refining TEMPUS Programme projects.

The projects which attracted grants under Action 3 were very precisely targeted upon extension of priority area associational networks or overcoming specific information deficits which it was thought might have negative effects for the extension and strengthening of the Programme as a whole.

Additionally under Action 3 of the Programme, a number of youth exchange activities (28 reciprocal youth exchange projects, 35 short preparatory visits and 2 training courses for youth workers) received TEMPUS support for the academic year 1990/91.

The total cost of all these Action 3 activities amounted to approximately 1 MECU.

TEMPUS in 1991/92

Proposals for academic year 1991/92 had to be submitted by 15 March 1991 (15 April for applications relating solely to Romania). In addition to Poland, Hungary and Czechoslovakia, support was also to be granted for cooperation activities with Bulgaria, Romania and Yugoslavia. The final budget available for 1991/92 is dependent on the results of discussions still going on concerning the overall programming of PHARE assistance for 1991.

HOW TO USE THIS COMPENDIUM

All the information in this compendium is based on the data available in December 1990, corresponding to the financial support approved by the Commission of the European Communities at that time.

In addition to the basic information provided on the Joint European Projects supported in 1990/91, the Complementary Projects under Action 3 of the Programme are also listed.

Data on Individual Mobility Grants are presented in the form of statistical tables showing the numbers and categories of grant awarded from and to each of the eligible countries.

The Compendium does not attempt to provide a full set of data on any part of the TEMPUS Programme but simply sets out to provide the user with the essential facts relating to the projects which were supported and with the information needed to contact the coordinators concerned. Anyone wishing to discover further details about a particular project should get in touch with the coordinator and not with the TEMPUS Office.

The Joint European Projects and the Action 3 Projects of which details are given in the Compendium are those which were supported. The 153 Joint European Projects supported are presented in ascending order of the registration numbers assigned to them while the 40 Action 3 projects which received grants are sorted first by the country of the applicant and then in ascending order of registration. It should be pointed out that the apparent preponderance of Action 3 Projects from a small number of Member States merely reflects the fact that most of the university associations applying for European Community support have their secretariats located in those countries, although their membership and activities are European Community-wide.

The Joint European Projects each occupy a single page, on which the user will find the descriptive title of the project, the subject area(s), the types of activity and forms of mobility involved in it, the title of the coordinating organization, the country codes and names of other organizations participating, and the contact details of the coordinator.

The list of Action 3 Projects simply provides the descriptive title of the project and the contact details of the coordinator.

It will be clear that the intention in both cases is not to provide an analytical or evaluative presentation but only to enable the reader to identify the nature of the Project and the coordinates of the person responsible for carrying it out. It was felt that to do this as soon as feasible would provide the basic working tool needed for those interested in making contact with existing Projects. In line with this strictly practical approach, the only finding-aid provided is a listing of the JEP registration numbers according to subject area of the Projects.

Since the material in the databases concerned was entered in English, the Compendium is published in that language only.
